Section 9. Concise Explanation of English Language Listed Information Items

NOTE: "Applicants may, if they wish, provide a concise explanation of why English-language information is being submitted and how it is understood to be relevant. Concise explanations are helpful to the Office, particularly where documents are lengthy and complex and applicant is aware of a section that is highly relevant to patentability or where a large number of documents are submitted and applicant is aware that one or more are highly relevant to patentability." Notice of April 20, 1992 (1138 O.G. 37-47, 38).

Disclosed herein are two newly cited references from related U.S. patent application no. 10/697,176, namely U.S. patent no. 4,798,580 (DeMeo) and U.S. patent no. 5,267,956 (Beuchat). Both of these references relate generally to pump cassettes for use with a pump (e.g., a peristaltic pump). Applicants believe that the claims are allowable over both DeMeo and Beuchat because, among other things, neither DeMeo nor Beuchat appears to teach or otherwise suggest the claimed inventions, including a mechanically operated spiking assembly as in the claims. Nevertheless, Applicants request that the Examiner perform an independent analysis of these references.

Also disclosed herein are two newly cited references from related U.S. patent application no. 10/697,450, namely U.S. patent no. 6,109,881 (Snodgrass) and U.S. published patent application no. 2003/0229302 (Robinson). Snodgrass relates generally to gas-driven pumps. Robinson relates generally to pump cassettes for use with a pump (e.g., a peristaltic pump). Applicants believe that the claims are allowable over both Snodgrass and Robinson because, among other things, neither Snodgrass nor Robinson appears to teach or otherwise suggest the claimed inventions, including a mechanically operated spiking assembly as in the claims. Nevertheless, Applicants request that the Examiner perform an independent analysis of these references.
